DETAILED ACTION

Acknowledgment is made of the receipt of the amendment received on 6/18/03. Claims 1-13 are currently pending.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Blanford (US 4,679,154).

Blanford teaches a UPC code, having encoded data and which lies on a label 50, which is scanned by a scanner assembly 30 to decode the encoded data. When the encoded data read by the scanner 30 is determined by a microprocessor 82 to be valid, a processor 88 will transmit the data over bus 26 to a back office processor 28 which, using the data as an address, will access a price look-up table 96 for retrieving the price of the merchandise item 52 being scanned. The numerical data representing the price of the item 52 is then displayed to a customer on a display member 68 (col. 4, line 18-col. 4, line 56).

Allowable Subject Matter

3. Claims 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record, particularly the Blanford reference, fails to teach, or fairly suggest either alone or in combination thereof, a display which includes an optical device positioned relative to the substrate to enable an observer to view the first image on the substrate through the optical device; the display displaying the second image in the optical device in order to spatially relate the second visible data in the second image to the first visible data in the first image. Also allowable over the prior art of record is the apparatus wherein the first image having first visible data and the second image including second visible data are projected onto a projection surface such that an observer sees a composite image of the first and second visible data formed by the second image overlaid and registered with the first image.

Response to Arguments

5. Applicant's arguments filed 6/18/03 have been fully considered but they are not persuasive. The examiner contends that the Blanford reference reads upon the newly amended claims. The newly amended independent claims cite the second image "being positioned relative" to the first image and the second image "spatially related to" the first visible data of the first image. The phrases "being positioned relative to" and "spatially related to" are hereby

viewed broadly as to suggest that the second image and first image may be close to one another or far from one another since, in either case, the second image and first image would be “relative” and “spatially related” to one another.

Therefore, in the case of the Blanford reference, the UPC code on the item and numerical data representing the price of the item on the display member ARE relative to one another such that an observer sees the numerical data representing the price spatially related to the UPC code.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
